EXPERIENCE

Freelance — IOS Developer & Graphics Designer

 Dec 2020 - Jan 2021

- Worked as a freelance developer to build the Fast Food application (Jain Fast Food) and deployed it on [App Store](#).
- Heavily used Firebase (firestore & authentication).
- Used Combine Framework to ensure that the user authenticates perfectly.
- Store/Upload data in JSON Format and use the same firebase account for Android & IOS applications.
- Used Core Location to auto location user current location.
- Last but not least, used cocoapods to implement Firebase & SwiftJSON.

Freelance — UI/UX and Logo Designer

 Nov 2020 - Present

- Design hi-fidelity mobile app ui and create promotional video using adobe softwares for local super market known as Humara Bajar.
- Create promotional mockup videos as well as wireframe, clickable prototype for clients.
- Design Logos majorly for business owners and artists, All my work is available on my [GitHub](#) page.

PROJECTS

Agora Vote Proposal Project

 Mar 2020

- Participated in Google Summer of Code (GSoC) and created a Proposal for Agora Vote IOS application.

Password Saving IOS App Project

 Jan 2020 - Mar 2020

- Build an app to store credential data (Like Password, Notes, etc).
- Used Combine Framework to ensure that the user authenticates perfectly.
- Used CoreData to store data in local storage.
- Used Neomorphic Effect to improve App UI
